

**A Flow chart of a sample Initial credentialing process**

**Notes:**

This is a general overview of the credentialing process. This flow chart is evaluated against a client's process and implementation is created based on the client's needs!

Med Advantage employs a single provider database so as to reduce the overlapping, redundant and repetitive application & verification process. This process has helped many organizations to reduce and streamline their credentialing process. The above can also be placed on a web portal for online credentialing submission, or can be collected via the CAQH application being implemented in many states.
